1. Applicant is again reminded NOT to follow a faxed copy with a follow-up copy (see 37 CFR 1.6(d) and 1.8(b)). As occurred this time, additional papers slow processing.

2. The drawings (including the corrections filed September 10, 2002) remain objected to because insulating materials, especially receptacle 16 and housing 12, should be properly crosshatched in the section views. See MPEP 608.02 for drawing conventions. It is noted that 16b, which should apparently be a void, is presently indicated by the crosshatching as a superconductor.

New corrected drawings are required in this application because the application is, otherwise, in condition for allowance. Applicant is advised to employ the services of a competent patent draftsman outside the Office. The **corrected drawings are required** in reply to the Office action to avoid abandonment of the application.

3. Claims 10 and 11 are objected to. On lines 21, 22, 27, 28 and 30-34 of claim 10, "electrical" should be changed to –electrically– in order to retain consistent terminology within the claims.

4. This application is in condition for allowance except for the following formal matter discussed above. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213. A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

5. Any response to this action may be mailed to:
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

or faxed to:
(703) 872-9306.
